# SYSTEM B

## *a complete data processing package*

The Southwest Technical Products "System B" is a complete and powerful data processing system. It combines a computer with 40K of memory, video input terminal and a dual drive diskette system in a matching desk. It puts ready-to-use computer power into business locations that could never before afford it. Now, for half the cost of another employee, any business can have a modern efficient data processing system for inventory, payroll, word processing, general ledger, order entry, or any other computer application.

System B features a high resolution video screen with both upper and lower case characters. Highlighting—dark on light—of individual characters and all cursor motion is programmable and can therefore be controlled by the program, as well as from the keyboard. The crisp well focused letters are a soft green color for comfortable viewing over long periods of time.

The dual diskette drives are capable of storing a total of one and a quarter million characters on-line. Dual drives make disk copying, or backup a simple fast operation. Information is transferred from the disks to computer memory by a fast DMA (direct memory access) type control system.

Up to seven additional peripheral devices, such as a printer, or additional terminals may be quickly, simply and inexpensively added to the system. Plug-in slots for this type system upgrade are provided as standard equipment with System B.

Every System B is delivered with a comprehensive Southwest Technical Products software package and a User's Guide. This software package is included in the price and features a multitasking Disk Operating and File Management system, a wide range of utility programs and disk BASIC. The full feature BASIC has both sequential and random file structure, floating point arithmetic with nine digit accuracy and full string handling capability. In addition to this material, other software is available for special applications. Editor—Assembler, Text Processor and Sort programs, to name a few, are available at reasonable cost to those users needing such software.

Many computer applications are more convenient if the computer can do two tasks at one time. System B does concurrent processing very simply and easily. You could for example be entering the day's orders on the video screen while the printer is printing a current inventory. This capability also makes it possible to delay printing until a more convenient time if the print-out is not needed immediately. System B can be expanded to operate with up to four input terminals of any type, each completely independent.

This complete, easy-to-use computer system is only \$4,495.00. How many applications do you have in which such a machine would be cost effective?

## IMPORTANT

All U.S.A. orders (including possessions, APO and FPO) are shipped prepaid (except C.O.D.) by the method of our choice. If you specify Motor Freight, Special Delivery, Special Handling, Air Parcel Post, Air Express, Air Freight, OR ANY METHOD OF SHIPMENT THEN YOU MUST PAY FOR ALL SHIPPING COSTS. C.O.D. ORDERS ARE PLUS SHIPPING COSTS.

## UPS

U.P.S. shipments can be made (on request) at NO ADDITIONAL CHARGE, but United Parcel Service can serve all states except Oklahoma, Kansas, Texas, Alaska and parts of Arkansas, Missouri and Nebraska. You must give street address on all U.P.S. orders; no P.O. Box numbers.

## BUS SHIPMENTS

We are several miles from the bus station. You must include \$2.50 with your order for us to get your shipment to the bus station. IN ADDITION YOU MUST PAY FOR THE COST OF SHIPPING.

## CANADIAN CUSTOMERS

We can ship our kits to Canada under the following conditions: We must have sufficient postage. First class mail rate is \$.13 per ounce and air mail is \$.17 per ounce. Parcel Post rates are \$1.75 for the first 2 lbs. and \$.50 for each additional pound. Minimum Insurance to Canada is \$.40 plus Parcel Post rates. Air parcel post service in Canada and all air shipments will be at \$.17 per ounce no matter what the weight. Air shipments cannot be insured. There is no COD service. ChargeX orders are welcome. Otherwise payment on Canadian orders must be in the form of a money order, or certified check payable in U.S. Funds. We cannot accept personal checks due to the cost of exchange and bank charges on "out of country" checks. We cannot accept company purchase orders for our kits. We will accept purchase orders from recognized educational institutions (\$25.00 minimum plus shipping).

## COUNTRIES OUTSIDE U.S.A.

We are able to accept foreign country orders only under the following conditions: The order must include full payment for the products being ordered in the form of a bank check, international money order. All correspondence must be in English.

Shipment can be made only at your risk, and sufficient postage must be included for transportation. We can only provide our usual invoicing with three copies. Any export papers, customs forms, or additional invoice copies will have to be made out by your export agent.

We accept no responsibility for delivery once the shipment is made. No claims for lost or damaged shipments will be accepted by this corporation.
